

CHARGEKART

ChargeKART

"Fuelling Mobility"

Sector: EV

Incubated Since: 2023

Current Stage: Products are developed and ready to go to market.

The Challenge: Permanent EV chargers are also costly and require installation.

The Innovation: Charge Kart have come up with a solution where users can charge their EVs at their convenience. Their user-friendly app allows EV owners to locate the nearest mobile charging unit that will provide on-site delivery of fast and adaptive charge All the user must do is book and pay for the charge the rest is taken care of by us.
