

ERMIN AUTOMOTIVE

"E-Mobility made easy"

Sector: Mobility & life style

Incubated Since: 2022

Current Stage: The Company has started its production for the e-conversion kits and is taking orders.

The Challenge: Electric cycle industry is still growing and people haven't adapted to the culture completely it would take another few years for the industry to get completely matured. But at this moment the retrofitting industry is very much growing rapidly and way matured than the complete cycle industry.

The Innovation: The startup **has** developed a platform, product, and service mix to give a holistic riding experience for consumers. Their e-bikes, e-cycles and e-conversion kits have a unique and innovative design that brings more bang-for bucks in the sector of e-vehicles in similar sector. The conversion kit is designed to be a simple DIY at home.
